- React Hook
- Webpack, Babel
- Typescript
- Git
- VScode
- Node JS
- NPM

AboutMe

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple "Hello World" has become a full-fledged passion that only gets more exiting as the years go by. Below you'll find projects I've completed that showcase my skills and general background in developing software.

Experience

LimitLess Web App (bit.ly/html-css_limitless)
Bsaed on the LimtLesss app, this application
Was design in HTML and raw Css also advanced css flex box, grid box and css animation keyfram.

Z-Technology Web app (bit.ly/bootstrap_z-technology)
Based on the Z-Technology is a employ dashboard app it utilize employ details, This application designed in HTML CSS Bootstrap.

Pancake Stack Website (bit.ly/sass_pancake_stack)
This is a fine dine restaurant website and design in HTML CSS and SASS. As well custemor can able to order through online.

Sally Exchange Rate Web App
(bit.ly/sally_exchange_app)
A money exchanging is more impotent for people. This is my favorite application. Utilize the money exchange API through HTML CSS and AJAX, vanilla JavaScript (no libraries) .

Education
